

# Public Opinion Survey of Residents of Ukraine

---

June 9 - July 7, 2017

# Methodology

- The survey was conducted by [GfK Ukraine](#) on behalf of the [Center for Insights in Survey Research](#).
- The survey was conducted throughout Ukraine (except for the occupied territories of Crimea and the Donbas) from June 9 to July 7, 2017 through face-to-face interviews at respondents' homes.
- The sample consisted of 2,400 permanent residents of Ukraine aged 18 and older and eligible to vote. It is representative of the general population by gender, age, region, and settlement size. An additional 4,800 respondents were also surveyed in the cities of Dnipro, Khmelnytskyi, Mariupol and Mykolaiv (i.e. 1,200 respondents in each city). A multi-stage probability sampling method was used with the random route and next birthday methods for respondent selection.
  - Stage One: The territory of Ukraine was split into 25 administrative regions (24 regions of Ukraine and Kyiv). The survey was conducted throughout all regions of Ukraine, with the exception of the occupied territories of Crimea and the Donbas.
  - Stage Two: The selection of settlements was based on towns and villages. Towns were grouped into subtypes according to their size:
    - Cities with a population of more than 1 million
    - Cities with a population of between 500,000-999,000
    - Cities with a population of between 100,000-499,000
    - Cities with a population of between 50,000-99,000
    - Cities with a population up to 50,000
    - VillagesCities and villages were selected at random. The number of selected cities/villages in each of the regions is proportional to the share of population living in cities/villages of a certain type in each region.
  - Stage Three: Primary Sampling Points (PSP) were described.
- The margin of error does not exceed plus or minus 1.7 percent.
- The average response rate was 58.6 percent.
- Charts and graphs may not add up to 100 percent due to rounding.
- The survey was financed by [U.S. Agency for International Development \(USAID\)](#).

# Methodology

## Regional Oversamples

- In addition to the national sample, four oversamples were conducted in the cities of Dnipro, Khmelnytskyi, Mariupol and Mykolaiv. The data was collected in each city from June 9 to July 7, 2017 through face-to-face interviews at respondents' homes.
- The sample size in each of the four cities consisted of 1,200 citizens aged 18 and older and eligible to vote. The samples are representative in terms of gender, age, and size of settlement. A multi-stage probability sampling method was used with the random route and next birthday methods for respondent selection.
- The margin of error does not exceed 2.8 percent in each city.
- The response rate in each city was:
  - 69.1 percent in Dnipro
  - 85 percent in Khmelnytskyi
  - 62.9 percent in Mariupol
  - 66.4 percent in Mykolaiv
- Charts and graphs may not add up to 100 percent due to rounding.

# Geographical Key

\*Due to the Russian occupation of Crimea and the ongoing conflict in eastern Ukraine, residents of Crimea and the separatist-controlled territories of Donetsk and Luhansk *oblasts* were not surveyed in this poll.
