### NATIONAL SURVEY OF MOLDOVA

May-June 2024

A PROJECT OF THE INTERNATIONAL REPUBLICAN INSTITUTE

#### Detailed Methodology

- The survey was coordinated by Dr. Rasa Alisauskiene from <u>Baltic Surveys/The Gallup Organization</u> on behalf of the <u>Center for Insights</u> in <u>Survey Research</u>. The fieldwork was carried out by <u>Magenta Consulting</u>.
- Data was collected from May 23 June 13, 2024 through face-to-face interviews in respondents' homes.
- The main sample consists of n=1,225 adults aged 18 and older and eligible to vote. It is representative of the general population of Moldova (except for Transnistria) by gender, region and urbanicity (urban/rural), according to the Moldova Statistical Databank, 2023.
- The sample of residents of Chisinau Municipality consists of 727 permanent residents of Chisinau Municipality aged 18 and older. It is representative of the Chisinau Municipality population by gender and settlement size (*urban/rural*), according to the Moldova Statistical Databank, 2023. It is made up of 320 interviews from the main sample and 407 oversample interviews. In order to obtain a more robust sample and a lower margin or error for the capital municipality, IRI oversampled Chisinau.
- A multistage probability sampling method is used, with random route and last birthday respondent selection procedures.
  - Stage one: All districts of Moldova are grouped into 11 groups; all regions (with the exception of Transnistria) were surveyed.
    - Stage two: Selection of the settlements (cities and villages).
      - Settlements were selected at random.
      - The number of settlements selected in each region was proportional to the share of population living in the particular type of settlement in each region.
  - Stage three: Primary sampling units were described.
- The achieved main sample was weighted for gender, region and urbanicity. The achieved sample of Chisinau Municipality was weighted for gender and urbanicity. The weighting procedure was based on the usual resident population data of the National Bureau of Statistics from 2023. Unlike the December 2019-March 2022 surveys, which included an age group weight for the national sample, the November 2022, July 2023, February 2024 and May-June 2024 samples were not weighted by age group due to a potential distortionary effect linked to international labor migration. Direct comparison of the four most recent rounds of data to previous waves may be affected by the different weighting scheme.
- The response rate was 57 percent.
- The margin of error for the mid-range of the main sample does not exceed ±2.8 points. The margin of error for the mid-range of the sample of Chisinau Municipality does not exceed ±3.6 points.
- Charts and graphs may not add up to 100 percent due to rounding.
- The survey was funded by the <u>United States Agency for International Development</u>.

### Frequently Cited Disaggregate Bases\*

Disaggregate	Category	Base	
	18-35	n = 306	
Age Brackets	36-55	n = 392	
	56+	n = 527	
Gender	Men	n = 565	
	Women	n = 660	
l lub a ni aitu	Urban	n = 525	
Urbanicity	Rural	n = 700	
Chisinau Municipality		n = 727	
Margin of error will vary with sample size n. Cited bases are weigh	ited.		

\*Disaggregation of age, gender and urbanicity presented for the main sample

Poll	Fieldwork Dates	Total Sample Size
National poll of residents of Moldova	January 27 - February 22, 2024	n = 1,247
National poll of residents of Moldova	July 11 - August 1, 2023	n = 1,199
National poll of residents of Moldova	October 1 - November 15, 2022	n = 1,648
National poll of residents of Moldova	September 16 - November 1, 2021	n = 1,619
National poll of residents of Moldova	February 9 - March 16, 2021	n = 2,001

#### About the Center for Insights In Survey Research (CISR)

Research and qualitative and quantitative public opinion data is a cornerstone of IRI's approach to programming. Our data ensures citizens' needs are at the center of the political debate and guide our projects' goals. To date, IRI has conducted more than 1,000 polls in over 100 countries, surveying more than 1.5 million people and measuring community attitudes on a wide range of issues.

IRI's research approach integrates CISR's methodological polling best practices protocol and field partner in-depth knowledge of the local research environment. This close collaboration begins at project design, with carefully calibrated sampling and instrument development, and continues throughout the entire fieldwork cycle to ensure the collection of reliable qualitative and quantitative data.

← For more of IRI's public opinion research, see <u>CISR's content</u>.

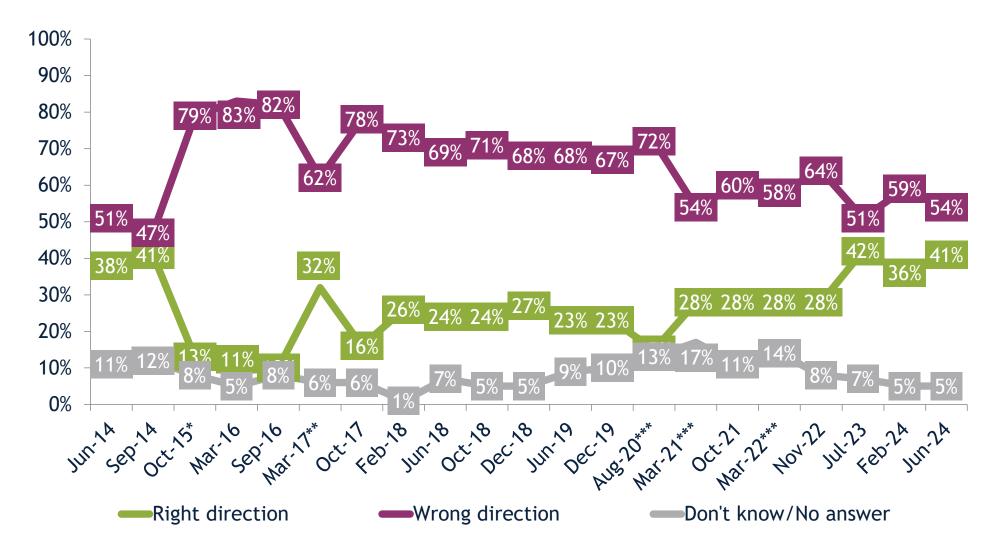

# General Outlook

п

A PROJECT OF THE INTERNATIONAL REPUBLICAN INSTITUTE

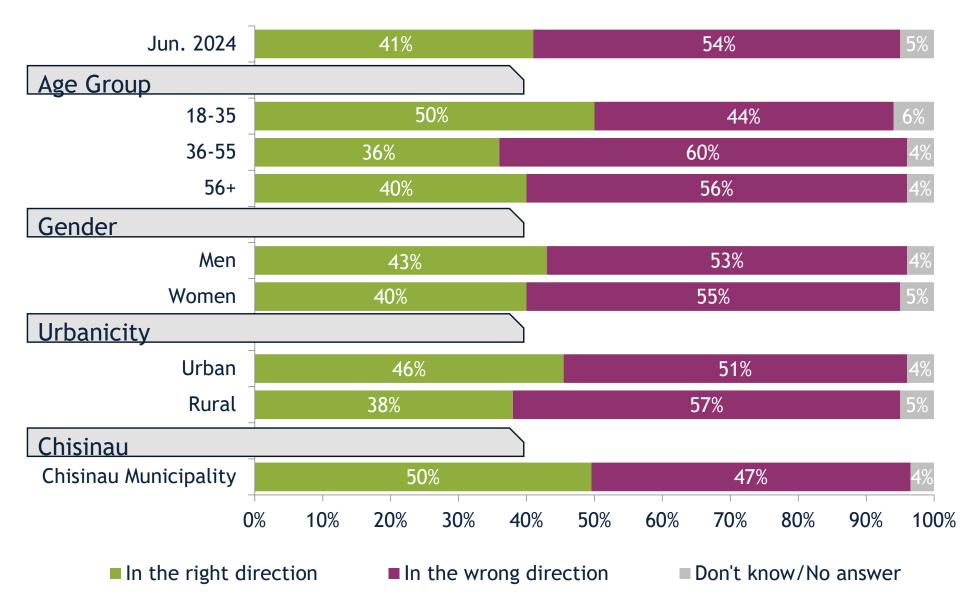

### In general, would you say that Moldova is heading in the right direction or the wrong direction?

\*In December 2014, news broke of a major banking scandal involving nearly \$1 billion missing from three state banks. The scandal is often referred to as "the stolen billion."

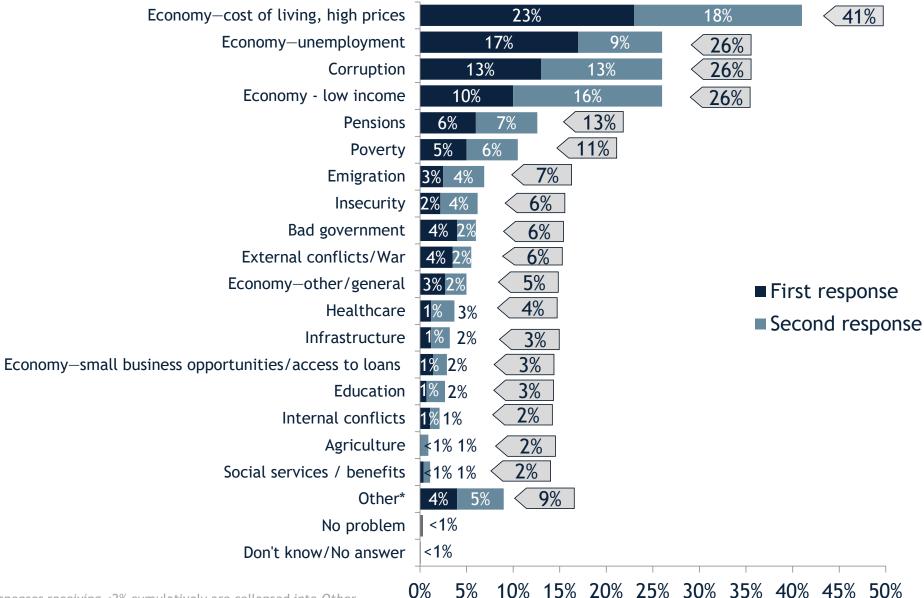

\*\*In 2016, Moldova conducted the first popular presidential election since 1996. Igor Dodon was elected in the second-round contest on November 13, 2016. \*\*\* Interviews for the August 2020, March 2021 and March 2022 surveys were done via computer-assisted phone interviews (CATI). Other polls were conducted through face-to-face interviews.

### In general, would you say that Moldova is heading in the right direction or the wrong direction?

### What is the most important problem facing Moldova today? And what is the second most important problem?

Residents of Moldova

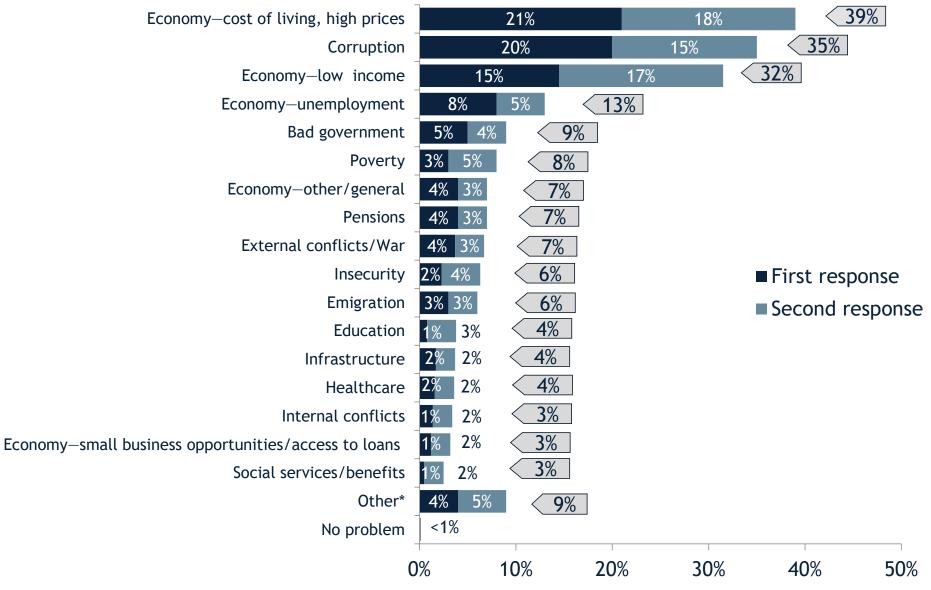

(Spontaneous response; up to two responses accepted)

\*Responses receiving <2% cumulatively are collapsed into Other.

### What is the most important problem facing Moldova today? And what is the second most important problem?

Residents of Chisinau

(Spontaneous response; up to two responses accepted)

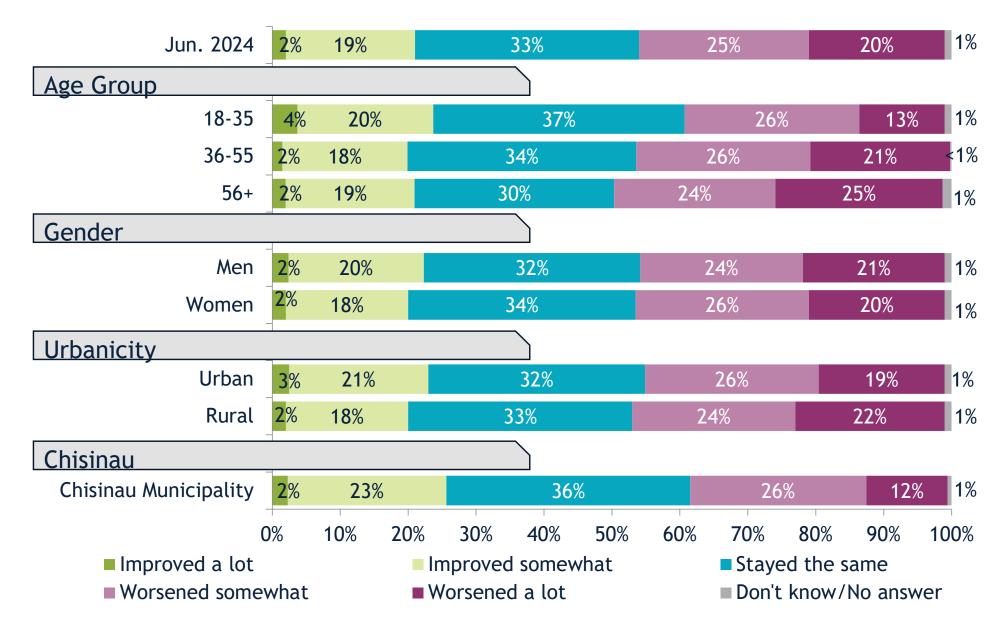

\*Responses receiving <2% in the sample cumulatively are collapsed into Other.
